

Software Finance

Did you know we can **fund 100%** software licenses as an asset?

Have you had a license audit and now face unbudgeted software costs?

Whether you are renewing, upgrading, or growing your software estate or deploying an entirely new solution, why not spread the cost?

Syscom PLC have partnered with Bluestone Leasing who are specialists in software finance, providing exceptional rates and access to the largest funding panel in the UK (40+ specialist banks and funders).

We fund a wide range of software solutions including:

- › Syscom ERP
- › Syscom Product Development Management
- › Microsoft Dynamics GP
- › Payroll Software
- › Business Analytics
- › Microsoft Dynamics CRM
- › SyscomERP Wardrobe Management
- › Microsoft Dynamics AX Warehouse & Distribution

Match your costs to the return on your investment

With a finance lease; costs are fixed for the entire term, and the VAT is spread too - meaning no large capital outlay. Why pay in full, up-front for assets which typically return their value over time?

Consultancy costs? Professional services?

Don't worry, we can wrap all of your project costs into one facility - complete funding for your entire expenditure.

Pain free

At Bluestone, our expert team manages the whole process for you and provides ethical, transparent documentation.

Take a strategic approach to your software

Using a finance solution allows you to adopt a strategic approach to your software costs moving forward. Paying small, fixed amounts on a regular basis removes the pain of ad hoc and often large demands on capital in the future.

Unlock discounts

If your supplier offers cost savings for longer term license commitments, leasing allows you to unlock these discounts without the need to pay upfront.

Not to mention the tax savings

Finance lease agreements are highly tax-efficient. Meaning the repayments, including any interest, are 100% tax deductible.
