

# CHOOSE A THIRD-PARTY IT MANAGED SERVICES PROVIDER

As ransomware and malware attacks increase on businesses, your IT is the frontline for your company. Ensuring your data is protected is paramount, which is why many businesses are turning to third party IT providers for the latest protection.

## WHY SHOULD I LOOK FOR THIRD PARTY SUPPORT?

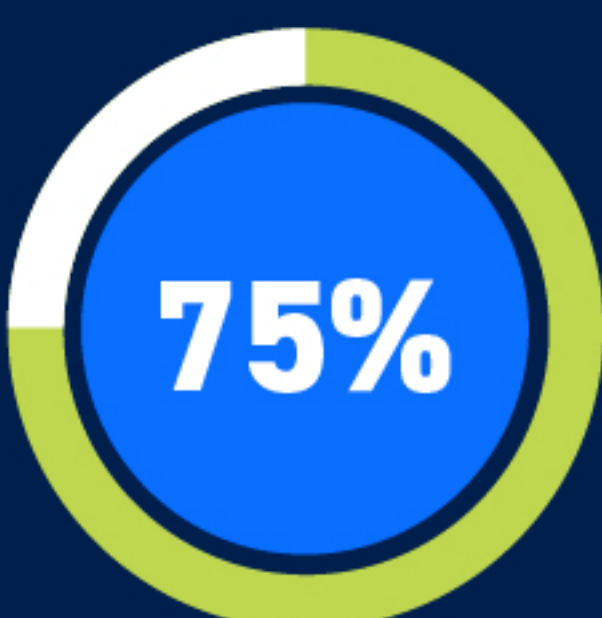

the increase of ransomware attacks in the first half of 2019

## TIME TO THINK ABOUT THE IT SUPPORT YOU NEED:

1

Looking to **reduce business costs.**

2

**IT issues** aren't being resolved.

3

**Outdated security** leaving you open to potential attacks.

4

**Outdated hardware** that needs regular maintenance.

5

**Software** that requires regular updating.

6

**Back-up** isn't up to the task.

## HOW MANAGED IT SERVICES CAN HELP YOU:

**24/7 protection** as staff are available round-the-clock.

**Top class security;** get the latest patches and updates with third party providers.

They work **directly with suppliers** such as Microsoft, so you have the latest software updates.

**Cost effective** – from pay-as-you-go per employee to savings made from not paying hardware, software and infrastructure maintenance costs.

**Efficient and reliable operations** – overburdened IT departments can hand over menial tasks so they can focus on bigger projects.
